Al Husn Palace, summer residence of his Majesty Sultan Qaboos, stands at one end of the promenade. Visit Al Balid museum located in the archaeological site.

# Khareef

Each year between June and September the coastal fringe of Dhofar and Salalah experiences the Khareef season, a colloquial Arabic term used to describe a unique weather pattern in the Middle East. The monsoon is caused by surface wind, which encourages an upwelling of waters in the Indian Ocean and, in turn, the cooling of the southern regions of Oman thanks to the moist air and rainwater created. The rains seen during these months change the landscape of Dhofar and blanket its mountains in lush greenery. The Khareef is marked every year from 21 June to 21 September with a festival in Salalah celebrating fashion, national heritage, local foods, music, traditional performances and folklore troupes.
